

Top-notch concierge services to fill every need

Experts at Custom Care Forever have thought of everything to make life easier for individuals and families. Whether you're a busy professional requiring a personal assistant, a senior citizen in need of support and assistance in your home, or a family worried about an elderly parent, they've got it covered.

Custom Care Forever is run by members of the Glau-bach family, who have many years of experience servicing the needs of clients. They know that reducing stress, freeing up time to enjoy life, and promoting peace of mind is what having a personal concierge is all about.

Custom Care Forever (CCF) is membership-based, with annual packages spanning from basic services to the full breadth of amenities. Every client gets a personal concierge who will discuss his or her unique needs and lifestyle, evaluating which services will best fit them. Some services are performed by the personal concierge, like grocery shopping, banking, appointment scheduling, plant care, etc. Others may require a service provider or specialist, such as an electrician, nutritionist or snow removal service. If the latter is needed, provider fees (which are negotiated in advance) are placed on the credit card filed with CCF. All employees and service providers are

vetted, bonded and insured.

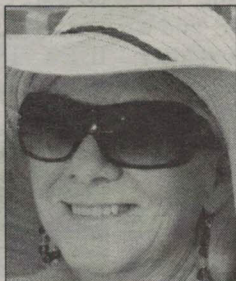

Flexibility abound, CCF will work with clients and make changes when the unexpected occurs. For example, if a client's pipe bursts, they will recommend a plumber who comes to the home, provides an estimate, and if OK'd, CCF oversees the process through completion.

Since the personal concierge works with a limited number of clients, there is always someone available, seven days a week. Whenever clients call, even after business hours, they will speak to a live person (as opposed to a recording or a beep to leave a message). Client service representatives are trained to contact the appropriate personal concierge to take immediate action and address the clients' immediate need.

Among the endless array of services are daily phone check-ins, medical awareness device assistance, light housekeeping, event plan-

ping, meal preparation, money management, appointment scheduling, nutritional help, and even game playing or reading to someone. Transportation and ambulance services can be arranged. All information provided by the client is kept strictly confidential. Call (516) CARE-4-ME to discuss a plan that best suits your needs.
